

INNOVATION CHARTER HIGH SCHOOL

New York State School Report Card

2024-25 School Year

The New York State Education Department publishes an annual School Report Card for every public school in the State, including public charter schools. It reports student achievement, graduation outcomes, attendance, accountability status, and staff and enrollment data.

NYSED publishes the report card as an interactive report rather than a fixed document, and the published data is updated as the State releases it. The link below is the official source and is always current.
